Work Experience

Front-end Developer | <https://uniquely.me/>

March 2025 - September 2025

- Led implementation of **UI/UX updates across multiple pages**, improving **mobile and tablet responsiveness** through CSS refactoring and responsive layout optimization.
- **Reduced page asset payloads from 100MB+ to as low as ~430KB (≤2MB max)** by optimizing images, eliminating redundant assets, and improving delivery strategy.
- Improved **page load performance and Core Web Vitals**, achieving **90+ Google Lighthouse scores** through front-end performance and SEO optimizations.
- Refactored and cleaned legacy CSS, resolving complex layout and styling issues while improving maintainability and scalability.
- Collaborated with **design stakeholders** to translate **Figma designs into pixel-accurate, responsive UI implementations**.
- Partnered with technical team members to resolve **Git conflicts and advanced CSS challenges**, contributing to a smoother development workflow.
- Ensured **cross-device accessibility and usability**, delivering consistent user experience across desktop, tablet, and mobile devices.

Web Developer | <https://www.golfiusa.com/>

October 2025 - October 2025

- **Redesigned and updated the Tailor Brands website**, enhancing functionality, aesthetics, and user experience.
- **Boosted weekly site traffic by 728%** (from ~58 to ~480 visits) in 2 weeks through SEO optimization, UX improvements, and targeted campaign promotion.
- **Increased engagement**, growing page views from ~200/week to ~920/week and weekly visits from ~350 to 960.
- **Improved website performance and SEO metrics**, raising Google Lighthouse score from 68 to 92 and increasing organic search impressions by 45%.
- **Implemented data-driven improvements**, analyzing site metrics (bounce rate, session duration, conversion rate) and optimizing navigation, layout, and content for better user retention.
- **Collaborated cross-functionally** with marketing and design teams to align website updates with brand goals and campaigns.
